THE FUTURE OF GRINDING

LMA
THE FUTURE OF GRINDING

ALL THE ADVANTAGES OF THE MONSTER MACHINE MM GRINDING MACHINE

Ideal for floor preparation and epoxy removal

System divided into 3 parts

The quick release system allows you to divide the sander into 3 parts:

- *handle group*
- *engine group*
- *planetary group*

Ideal weight

Ideal weight (103kg) for easy transport and loading / unloading operations without excessive effort.

Head overturningg

A practical head tilting system makes the combination of tools easy and comfortable.

Gear Plate

Tempered steel Gear plate Ø140mm B

Extra weight

Extra weight of 12kg can be added for the toughest jobs.

Multifunction sander

The MONSTER MACHINE MM is a **multifunction grinding machine** *equipped with GEARPLATE ideal for* **leveling and grinding** *of civil surfaces of all kinds such as concrete. Ideal for removing resins, paints and glues.*

Powerful 4Hp motor

Light but solid structure with **oversized wheels** *that does not allow easy movement, with the possibility of working both as a single disc machine and as a sander.*

Locking pin between the wheels

The presence of a locking pin between the wheels and the casing allows you to **switch from the single-brush mode with wheels on the ground to the swing mode with raised wheels.**

Foldable Handle

Foldable, ergonomic and adjustable handle
